

**AMENDMENT TO RULES, REGULATIONS, POLICIES AND PROCEDURES OF PEARLINGTON**  
**WATER AND SEWER DISTRICT OF HANCOCK COUNTY, MISSISSIPPI**  
**ADOPTED MAY 2011**

**GENERAL POLICY**

No person shall discharge or deposit or cause to permit to be discharged or deposited to the public sanitary sewerage system any wastewater containing any pollutant or other material of such character or quality that will:

**Oils, Grease and Wax**

Any wax, grease, or oil or at a concentration of more than 100 mg/1, whether emulsified or not, containing substances which may solidify or become viscous at temperatures between 32 degrees F and 150 degrees F (0 degrees C and 65 degrees C) at the point of discharge into the system.

Any oil, wax or grease, whether emulsified or not, which will or may:

Deposit oil, grease, or wax in the sewer lines in such manner as to clog the sewers or impede the flow;

Overload the sewage treatment facility's skimming and grease handling equipment;

Not be amenable to biological oxidation and may therefore pass to the receiving stream without being affected by the normal sewage treatment process; or

Have any other deleterious effect on the sewage treatment process due to excessive quantities or concentrations.

Grease, oil and sand interceptors shall be provided when they are necessary for the proper handling of wastewater containing free or emulsified oil and/or grease exceeding 50 mg/1, or any flammable wastes, or other harmful ingredient except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the County Building Department and shall be located so as to be readily and easily accessible for cleaning and inspection.

Any person not maintaining an interceptor shall be subject to a fine and any costs incurred by the District associated therewith to be set by the Board of Commissioners.
